Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE three (3) MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 and 5-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Morris.

Morris discloses a classifier and a method for segregating particles by size or density. The classifier and method comprise a fluidization chamber 6 adapted to contain a fluidized bed; a fluidization means 8 for providing a flow of fluidization fluid into the chamber; and one or more array of inclined plates 17-21 and/or 25-27 mounted within the chamber positioned such that particles elutriated by the fluidization fluid within the chamber are caused to be segregated above or below the plates according to their size or density. The plates comprise a plurality of an array of parallel equally spaced plates extending across the chamber. Re claim 7, a feed fluid is element 10 between the two array of inclined plates.

3. Applicant's arguments filed on March 11, 2003 have been fully considered but they are not persuasive.

Responding to applicant's remarks, applicant has alleged that there is no teaching in Morris that the plates cause particles to be segregated above or below the plates according to their size or density. However, the Examiner respectfully disagrees. As cited in column 4, lines 19-54, and as broadly claimed, the particles are segregated above or below the plates 25, 26, 27,

17, 19 or 21. As shown in Fig. 1, these plates are mounted within the fluidization chamber contrary to applicant's allegation.

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
